

**IN THE SPECIFICATION:**

Please replace the paragraph beginning on page 4, line 8, with the following amended paragraph:

This problem is solved according to the invention by ~~a device designed or produced in accordance with the characteristics of claims 1 and 15. The subordinate claims disclose further characteristics and advantageous improvements of the invention~~ a medical device that releases drugs for the selective therapy of specific diseased tissues or organ parts, characterized in that lipophilic, largely water-insoluble drugs that bind to any tissue components adhere to the surfaces of devices that come into contact with the diseased tissue by being pressed against it at least for a short time and immediately release the active agent when in contact with tissue, and of a method for producing such a device characterized in that the lipophilic drugs and excipients in a solution, suspension or emulsion medium are applied using an immersion, spreading, or spraying process or an instrument which delivers a defined volume to the surface of the device while excess media and substances that adhere loosely to the surface are removed.
